Ruta BARRANCO MAGRO

VILLAHERMOSA DEL RÍO

Route BARRANCO MAGRO

The route begins on the road CV-175 towards Castellón, where find an indicative arrow, in the entrance of the track that takes us to the beginning.

At the access to the ravine we found a panel indicating the route to take. we start going down some stairs that give us access straight to the ravine.

We follow the marked route, along along which we meet different handles that we help to make the way and in case if there is water to cross these sections.

We'll come to a crossroads, if we head on the right, we can access another path that will show us some beautiful natural waterfalls belonging to the Bco. the Bibioj.

If we head to the left, we will arrive at the place called La Cura's house and we follow the path

We advance the route following the directions, which leads us to the bridge where we once crossed gives you the opportunity to move on town, or link to the left with the Bco. the Hoz route, which ends in the recreational area of the swans, in the lower part of town.

The wealth of geology reigns in its journey. The erosion process of ancient mountains that took place in the Triassic, has remained exceptionally represented.

The main channel of the Bco is surrounded of small tributaries, ravines mostly rocky limestone.

Visit the ravine in the four seasons of the year, allows lovers of botany discover the plants that inhabit in its different states.

Before doing this route you must have note that the bco is a zone floodable and slippery.
